QUALITY POLICY

Carnegie Wave Energy Limited's ("Carnegie") is an Australian based organisation focused on developing and commercialising the CETO wave energy technology. Carnegie aims to be the leading global developer of reliable, clean and renewable wave energy by delivering quality products and services in a professional and cost effective manner which will satisfy or exceed the requirements and expectations of our customers and interested parties.

We are committed to:

- Creating a culture of commitment to goals and objectives by establishing and reviewing of quality objectives and ensuring they are communicated and understood throughout the whole organisation
- Maintaining an effective and efficient Management System throughout the organisation aligned with the requirements of the ISO 9001:2015 International Standard
- Compliance to legal and statutory requirements
- Commitment to continually improve the effectiveness of the Management System
- Promoting the value of team work and employee participation in suggesting and identifying improvement opportunities including consideration of associated risks
- Providing adequate resources to plan and implement actions to address opportunities and risks thereby achieving improved results and preventing negative effects
- Adhering to Policies and Procedures in accordance with the Management System
- Working with our customers and providers to continually improve the quality of our products and services
- Review the policy for continuing suitability aligned with the organisation

This policy applies to all of Carnegie's personnel, subsidiaries, providers and visitors affiliated with Carnegie, across all projects and operations at all times.
